

Nomination Form for the World Sustainability Award

Section I: Personal and Nomination Details

1. Nominator's Details

Title and Name

Position &
Institutional Affiliation

Phone number

Email Address

Website (optional)

2. Nominee's Details

Title and Name

Position &
Institutional Affiliation

Phone number

Email Address

Research Profiles

Section II: Eligibility & Background Information

1. Which primary sustainability domain does nominee's impact most align with?

- Biosphere (ecology and environmental science)
- Society (social and cultural aspects)
- Economy (economic development and systems)

2. Nature of Contribution

Indicate the primary nature of the nominee's contribution. Select all that apply.

- Foundational (theory, methods, measurement, conceptual advances)
- Translational (tools, models, frameworks, synthesis)
- Applied / Implementation (policy, practice, systems, interventions)

4. Key Outputs and Supporting Evidence

Please provide 3–5 key outputs that best represent the nominee's contribution (e.g., publications, patents, datasets, methods, policy reports, systems, or other relevant outputs), including title and identifier (e.g., DOI or link). Outputs should be appropriate to the disciplinary context and nature of the work.

For each output, include a brief description of its relevance and contribution (1–2 sentences).

Section III: Impact Assessment

Impact may be demonstrated through multiple pathways, including foundational research, methodological advances, translational contributions, or applied and policy outcomes. Responses must adhere to the word limit.

1. Real-World Engagement and Application (Max 250 words)

Please describe how the nominee's work has been applied, used, or otherwise engaged with beyond purely conceptual contexts, where applicable. Indicate the relevant settings (e.g., policy, industry, research, or community), key stakeholders or organizations involved, and the scale of engagement (local, national, or global).

2. Measurable Impact (Max 250 words)

Please provide evidence of the impact of the nominee's work, including measurable and/or otherwise verifiable indicators of influence (e.g., citations, uptake in assessments or analytical frameworks, incorporation into policy-relevant processes, or advancement of theory, methods, or practice).

3. Significance and Field-Level Contribution (Max 150 words)

Describe the contribution to one or more of the following domains: biosphere (environmental systems, ecosystems, biodiversity), society (equity, inclusion, cultural systems, health, well-being), or economy (resilience, circularity, financial inclusion, transformation). Highlight systemic relevance.
